## **DETAILED ACTION**

## Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: claim 1 has been allowed over the prior art because they fail to teach a laser beam generating assembly comprising a coaxial laser resonator generating a circular sector shaped beam cross section with azimuthal polarization and an optical beam reforming system through which the lower bean extends in a beam path including a mirror with a reflective surface shaped in the form of a circular sector of a parabolic rotational body, said beam reforming system reforming the circular sector shaped laser beam into one having a rectangular cross section with linear polarization.

The following is an examiner's statement of reasons for allowance: claim

10 has been allowed over the prior art because they fail to teach in combination a

coaxial laser resonator with an annular discharge chamber and a circular

sector shaped output opening generating a laser beam with a circular

sector shaped beam cross section and azimuthal polarization and an

optical beam reforming system providing a beam path therethrough and

including a mirror with a reflective surface shaped in the form of a circular

sector of a parabolic rotational body, said optical system reforming the
